SOLAR PV ENERGY TECHNICIAN TRAINING PROGRAMME

Project Report, March 2021

Contents

Background	01
Project achievement	02 - 12
Project approach	13 - 14
Project innovation sustainability & challenges	15
Beneficiary feedback	16
Annexure I Students details	17 - 118
Annexure II MOU with educational institution	119 - 124
Annexure III Brief about Advit Foundation	125 - 126

BACKGROUND

As India transitions towards achieving a developed nation status, issues with energy security and climate change threaten to reverse the progress made so far. Innovative renewable energy solutions ranging from small household solar systems to large scale power plants address issues with energy access, job creation and decarbonising the environment and the economy.

National Solar Mission by the Government of India is a major step in this direction to address key development challenges. The programme, initiated in 2010, aims to install 100 GW of Solar Power by 2022 with 60% ground mounted systems and 40% rooftop systems. As of February 2021, only 37 GW has been installed and most of these installations are ground mounted systems catering to the 60% of the target while the rooftop installations are yet to gain momentum. This indicated the need for interventions that can aid in escalating the pace at which the solar power systems are being installed.

Among many other challenges, one of the main reasons for the lack of pace in solar installations is a lack of trained technicians with the necessary awareness and skills to develop a thorough understanding to take forward the installations, particularly smaller rooftop systems. In order to address this need, an upskilling programme in Solar Photovoltaics (PV) was designed targeting the youth from vocational backgrounds in electrical, electronics and related fields.

This project aimed at skilling 800 youth in the basics of solar photovoltaic system design, installation and maintenance.

Basis for intervention

- 1. Alignment with government goals :** This programme is a strategic intervention to support the National Solar Mission of the Government of India, also an essential component towards meeting SDG 7. Upskilling youth on solar energy technologies equips them to explore entrepreneurship. This aligns with the government's focus on creating jobs through initiatives such as Startup India.
- 2.. Industry demand :** Acute shortage of skilled manpower exists in solar industry. Also, state electricity boards and distribution companies require individuals with the knowledge of Renewable Energy systems to help implement state level RE targets and policies. The targeted vocational students from Government ITI and Polytechnics are upskilled with the required knowledge to undertake.*
- 3. Education Sector :** Educational institutions, especially government technical training institutions are ill equipped to meet the evolving industry demand. This programme not only trains students but also encourages participation from faculty members at the participating institute, thereby preparing the institute for future formal programmes in Renewable Energy.

PROJECT ACHIEVEMENT

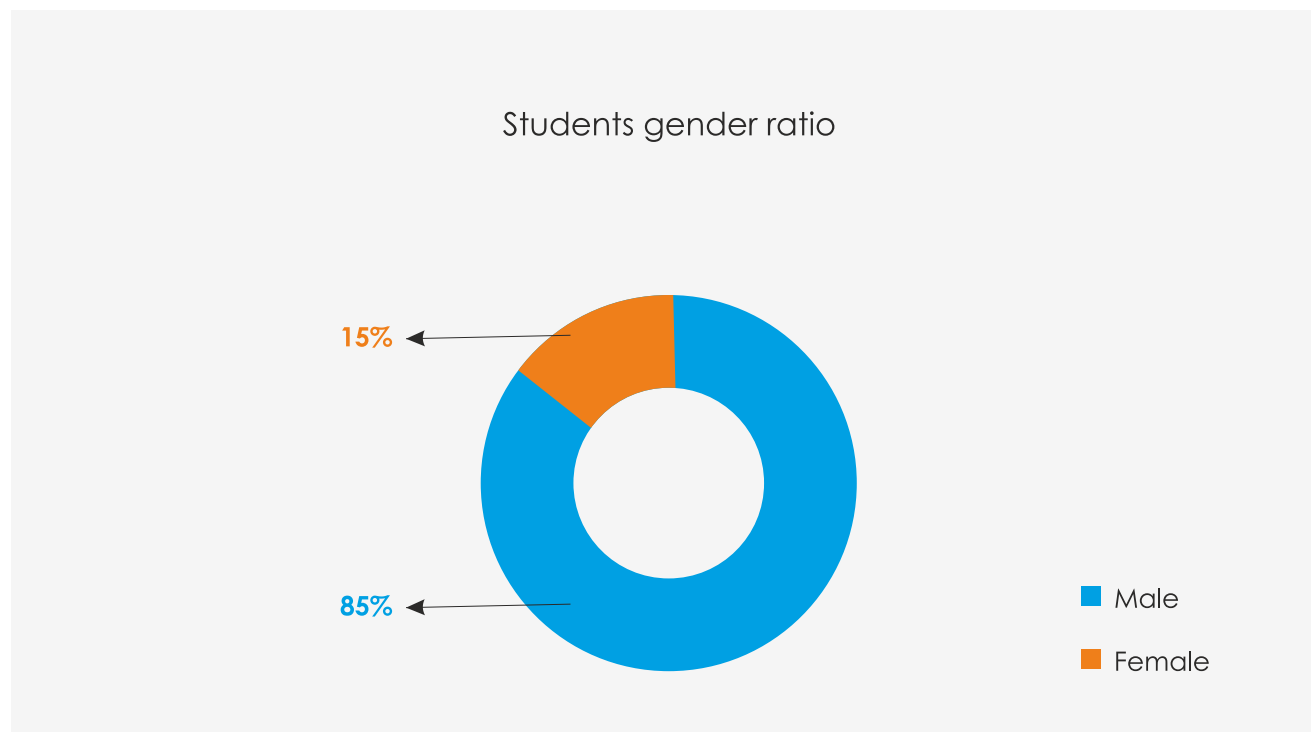

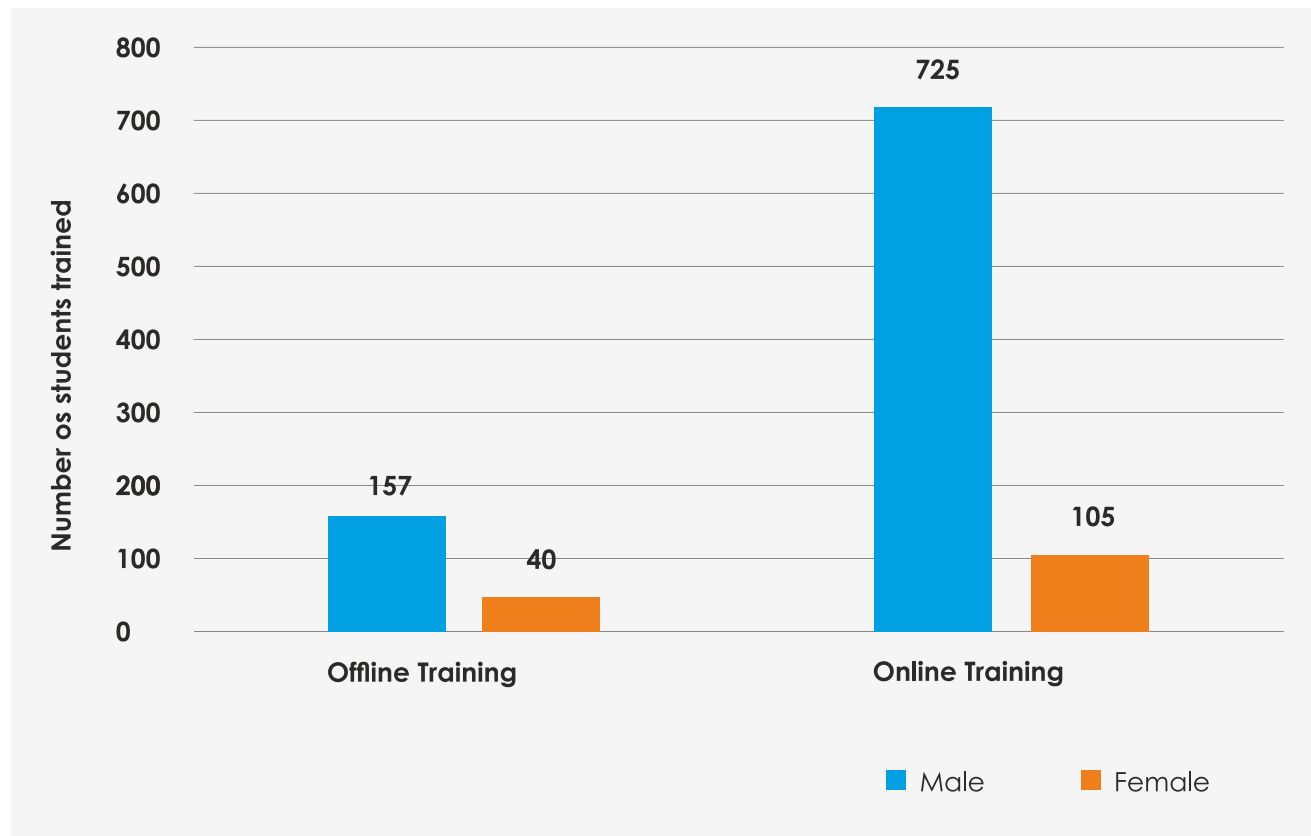

Project achievements:

- A total of **1036 students** have successfully been **trained** as part of this project since October 2019.
- Students from **15 different educational institutions across 7 states** were part of the training.
- Students from **12 different trades in diploma and ITI programmes** of various government educational institutions underwent this training.
- **15%** of the students trained were **females**.
- **Faculty members** of the participating educational institutions were also **trained**.
- Skill Council of Green Jobs assessment was conducted for 206 candidates as part of the offline solar training.
- Advit Foundation's assessment was conducted for all the online training candidates.
- **Special sessions by industry experts** about solar industry market trends, job opportunities were conducted.
- **Partnerships with CLEAN network** was established to strengthen the solar training program.
- **MOU** with Government Polytechnic, Manesar, Haryana was **signed** to take forward the solar training program at their institute.

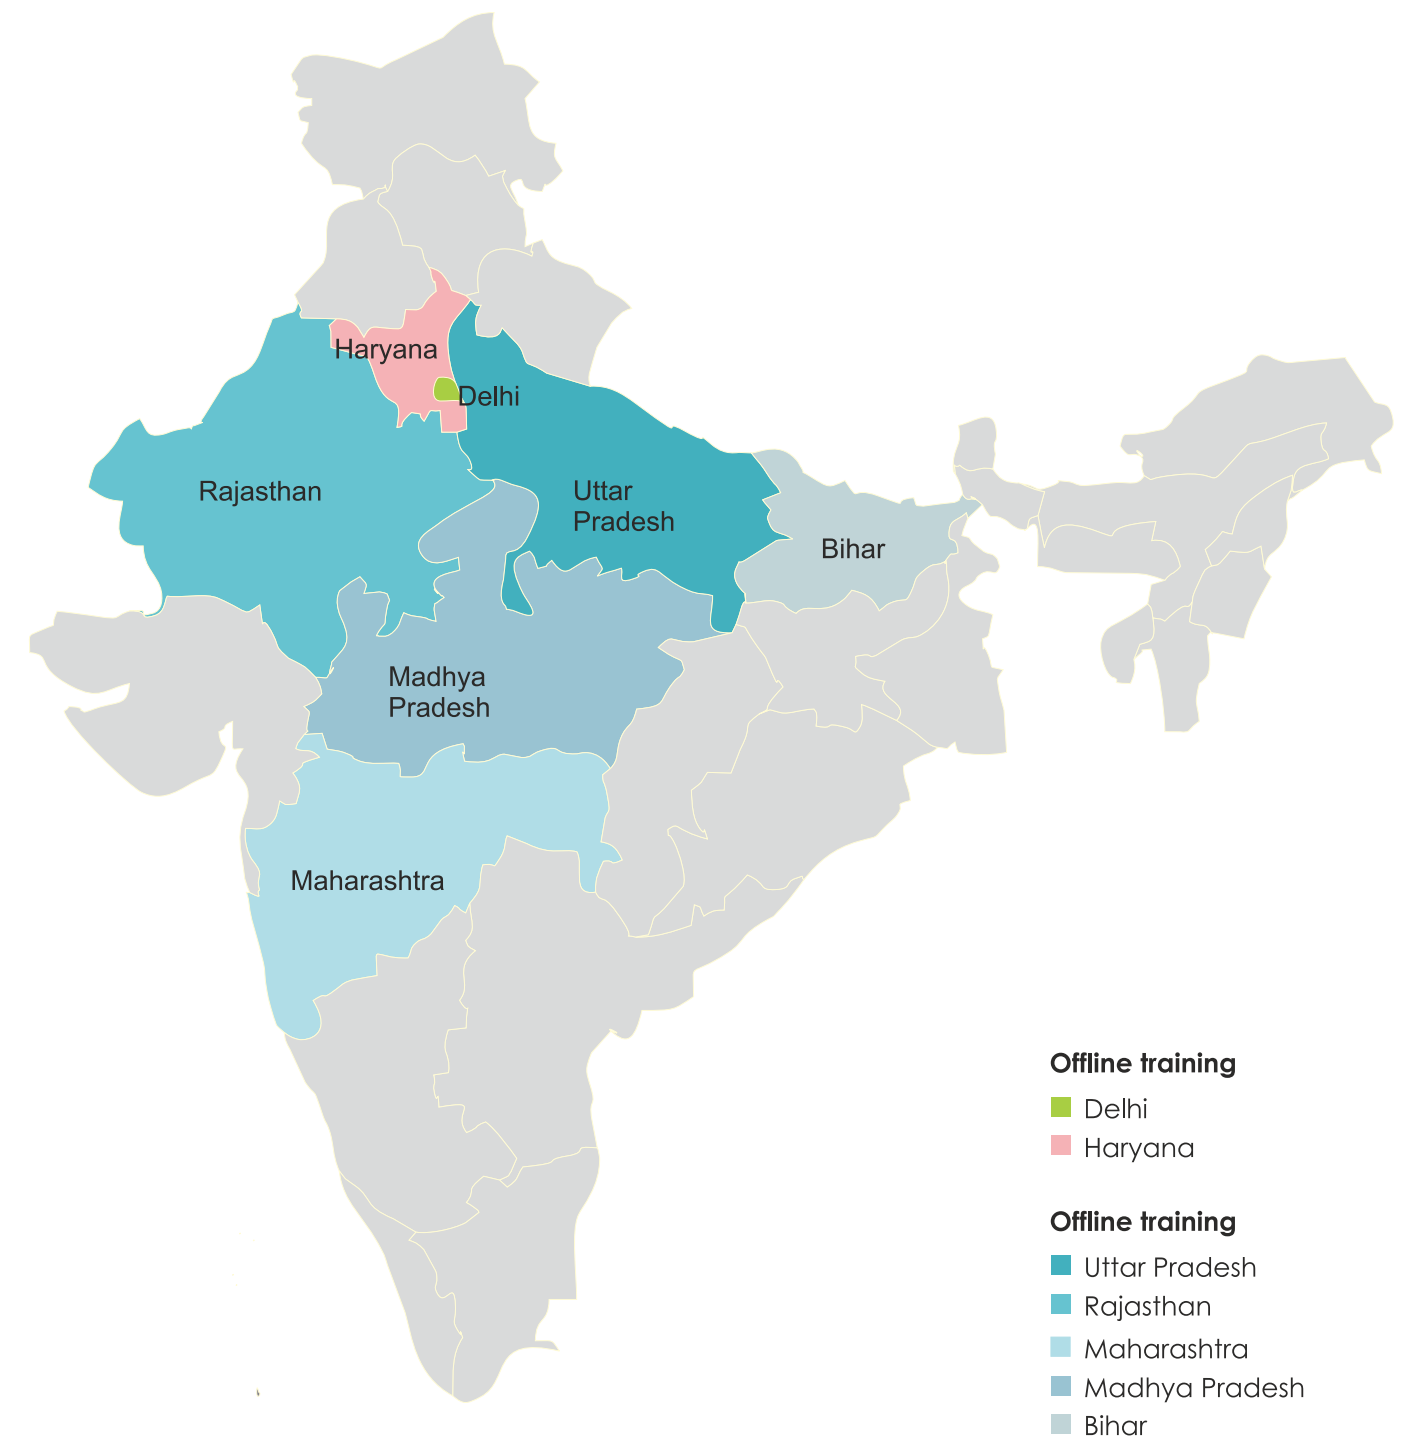

Diversity, Equity and Inclusion : Advit Foundation strives to maintain diversity at the workplace and while implementing projects 25% of our solar trainers are women. 15% of the trainees trained are women. Special efforts were taken to conduct trainings at all women educational institutes. There has been one physically challenged trainee and practical trainings were customized to make movement easier for this trainee.

Key project data points:

Total students trained: 1036 (Offline training 206 + Online training 830)

Students from the following states were part of the solar training:

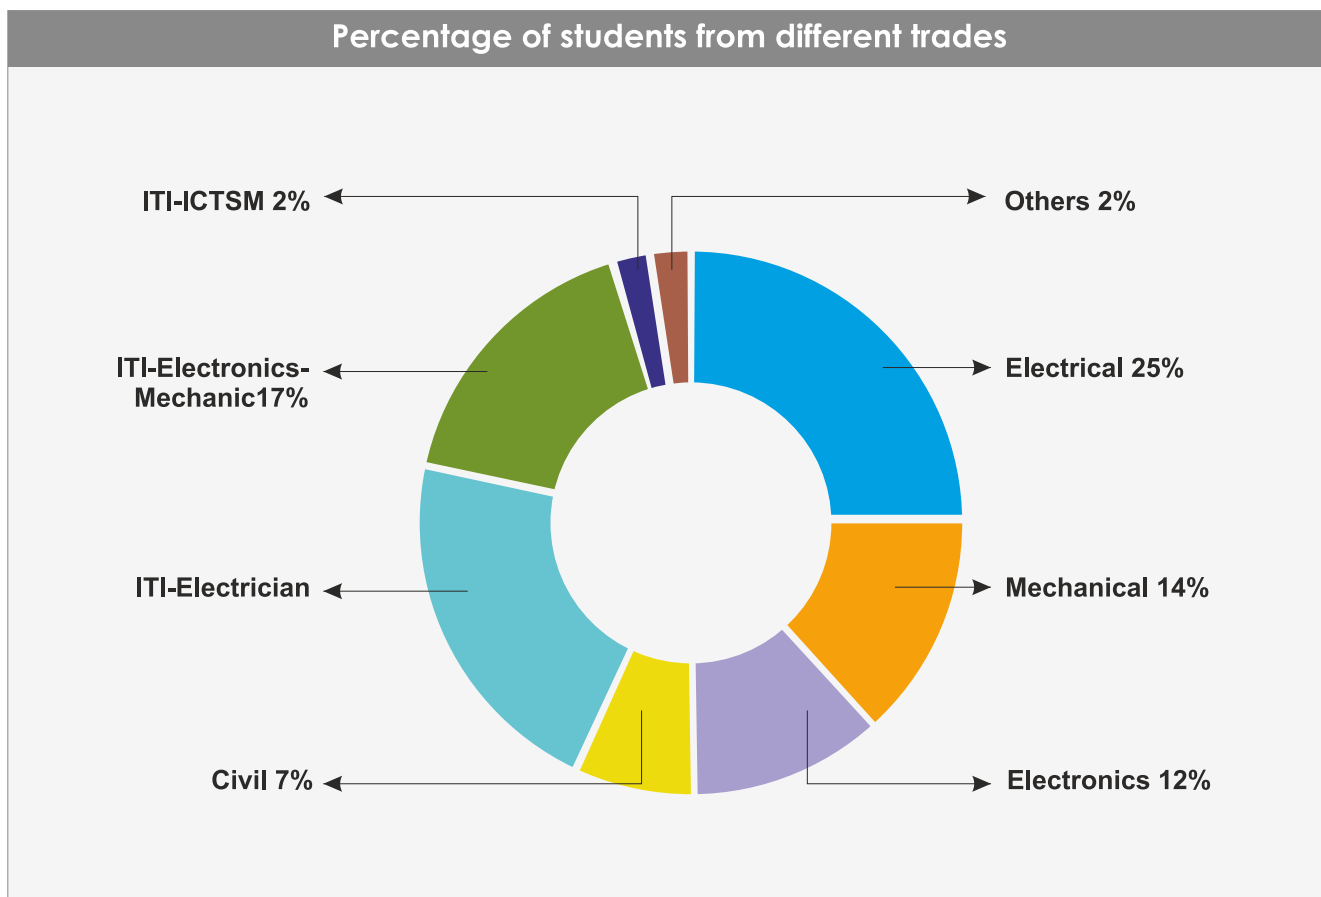

List of the participating educational institutes:

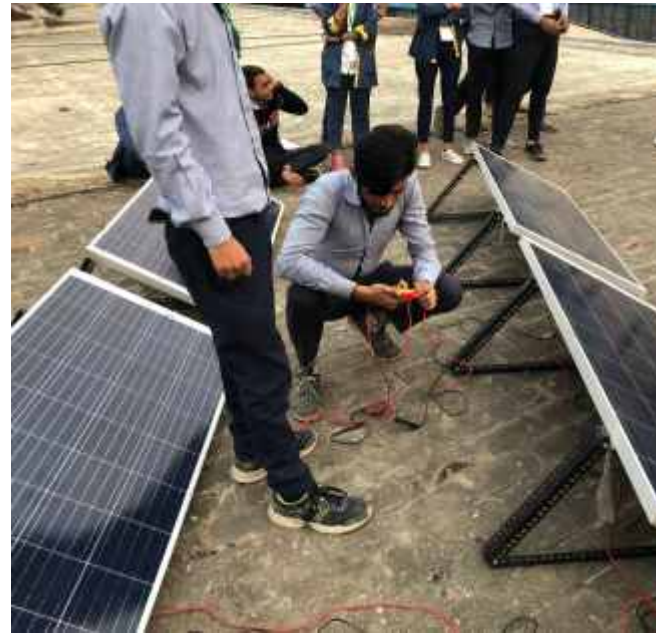

S.No	State	Institute name
1	Delhi	H.J. Bhabha Government ITI, Mayur Vihar Ph 1, Delhi
2	Haryana	Government Polytechnic, Manesar, Haryana Government ITI, Pali, Faridabad Government Women's ITI, Uncha Gaon, Faridabad
3	Uttar Pradesh	Government Polytechnic, Barabanki, Uttar Pradesh G. I. Bajaj Institute of Technology and Management, Greater Noida Government Industrial Training Institute, Moradabad, Uttar Pradesh Allahabad College of Engineering & Management, Uttar Pradesh
4	Rajasthan	Government Polytechnic College, Makhupura, Ajmer, Rajasthan Government Polytechnic College, Bhilwara, Rajasthan Government Ramchandra Khaitan Polytechnic College, Jaipur, Rajasthan Government Polytechnic College, Alwar, Rajasthan
5	Maharashtra	Government ITI, Latur
6	Madhya Pradesh	Oriental Institute of Science and Technology, Bhopal
7	Bihar	J.N. College, Madhubani

PROJECT APPROACH

A holistic approach for effectively imparting the solar training was adopted. Offline Solar training programme at the educational institutes before COVID restrictions from October 2019 to March 2020 were conducted and Online training post COVID restrictions from April 2020 were conducted. The implementation strategy for the Offline and Online trainings were modified to best accommodate the technical, social and aptitude levels of the learners.

Offline solar training approach :

- Educational institutions were identified and contacted for scheduling training sessions.
- A week-long duration was mutually decided and our solar training experts visited the educational institutions to impart trainings.
- Learners current level of training was assessed to identify the best way to deliver the training.
- Batches of 30 students were identified and theoretical and practical training was imparted.
- Practical sessions were conducted on portable mini solar power plant developed by Advit Foundation.
- Students were encouraged and trained on certain soft skills to enhance their employability skills.
- Assessment of these students was conducted by external assessing organisations.
- Feedback from the students was collected to assess the programme quality perception of the students.
- Separate Whatsapp groups were created for each batch to facilitate information exchange about industry trends and job opportunities during and post the training programme.
- Soft copy of the solar training guide book, developed by Advit Foundation was shared with all the students.

Online solar training approach :

- Since no educational institution was open during COVID lockdown from April 2020, the trainings had to be made online.
- Educational institution representatives were contacted to ascertain the viability of conducting online training programmes considering the technological challenges.
- Online application forms were circulated with students to gauge the aptitude level of the learners.
- Separate Whatsapp groups were created to share periodic information about the sessions.
- 1 hr session every weekday for a month per batch was conducted.
- Experts from various solar industries were invited to share their industry experience online.
- Practical demonstration sessions were periodically conducted on Advit's Training kit.
- Post session every student was expected to take an online assessment and submit assignments on how to design solar system for their home.
- Soft copy of the solar training guide book, developed by Advit Foundation was shared with all the students.

Content outline used for the training:

S.No	Module	Objectives
1	Fundamentals of solar energy and electricity.	Basic understanding of Solar energy and electricity.
2	Basics of solar PV technology.	PV technology working principle.
3	Battery, inverter, charge controller and MPPT.	Basic understanding of battery, inverter, charge controller and MPPT.
4	Site survey and system design.	Learn how to do a site survey and design an appropriate PV system as per quality standards and existing regulatory framework.
5	Electrical, mechanical and civil structures.	Learn about different wiring connections, mechanical and civil structures required for a PV system and understand about installation and maintenance procedures.
6	Energy economics, entrepreneurship and Software.	Financial aspects involved in a PV system, entrepreneurship and software used for PV System design.
7	Soft Skills.	SOP for safe operations, Organizational behavior, Enhancing communication skills, Resume building, Team work, Importance of customer service and satisfaction, reporting methods and MS Office essentials, Basics of Project management.

PROJECT INNOVATION, SUSTAINABILITY & CHALLENGES

COVID related challenges: Due to the COVID-19 pandemic, educational institutions across the country were shut down from March 23, 2020. All the solar training sessions planned with various educational institutions in Delhi-NCR had to be cancelled. This unique challenge prompted us to move our trainings from Offline to Online. Government polytechnic and technical training college students from economically challenged backgrounds from remote parts of the country were decided to be the target beneficiaries for the online training programme. Since most of these students were in villages where the network connectivity is not too strong and online trainings were relatively new to them the operational challenges had to be ironed out. A pilot session was conducted to identify the viability of conducting such training programmes and post successful outcome of the pilot regular online solar trainings for students were conducted. The practical training sessions had to be made into online demonstration sessions.

Sustainability : For long term sustainability of the project, the teachers of educational institutions from where the students were attending our program were made important stakeholders. The training implementation strategy was designed and modified in close collaboration with the teachers. Since most of the government technical training institute teachers are not formally taught about solar technologies, they were encouraged to attend the solar training sessions and all relevant training content was shared with them to take the training program forward in the future.

Technical Innovation : The practical solar training kit developed by Advit Foundation is versatile and portable allowing the trainers to carry the entire kit in a car to educational institutions and offer hands-on practical training to the students. 6 different experiments can be conducted on this portable training kit. Since most of the students attending the session are from government technical training institutions, they learn better during such practical sessions about designing, installations and maintenance of solar systems.

Online training Innovation : The training content developed for Offline trainings had to be moved online and existing online resources such as Google meet, forms, spreadsheet etc were used for the training. Special plug-ins were also used to automatically take students attendance in order to save time. Since most of the students did not have computer or laptops, they had to be trained on how to use mobile phones to make Excel based solar system design models.

BENEFICIARY FEEDBACK

“ I learned a lot about solar energy technologies from this program. The teachers are kind in nature and well trained. It is easy to connect with them and understand what they try to teach.”

Srashti Jain
ICTSM student, Govt. ITI,
Mayur-Vihar

“The trainers were very good in delivering thoughts and ideas about solar technology and I was able to get what they were trying to say. All sessions were effective and I can say I learned something new, good that can help in my career.”

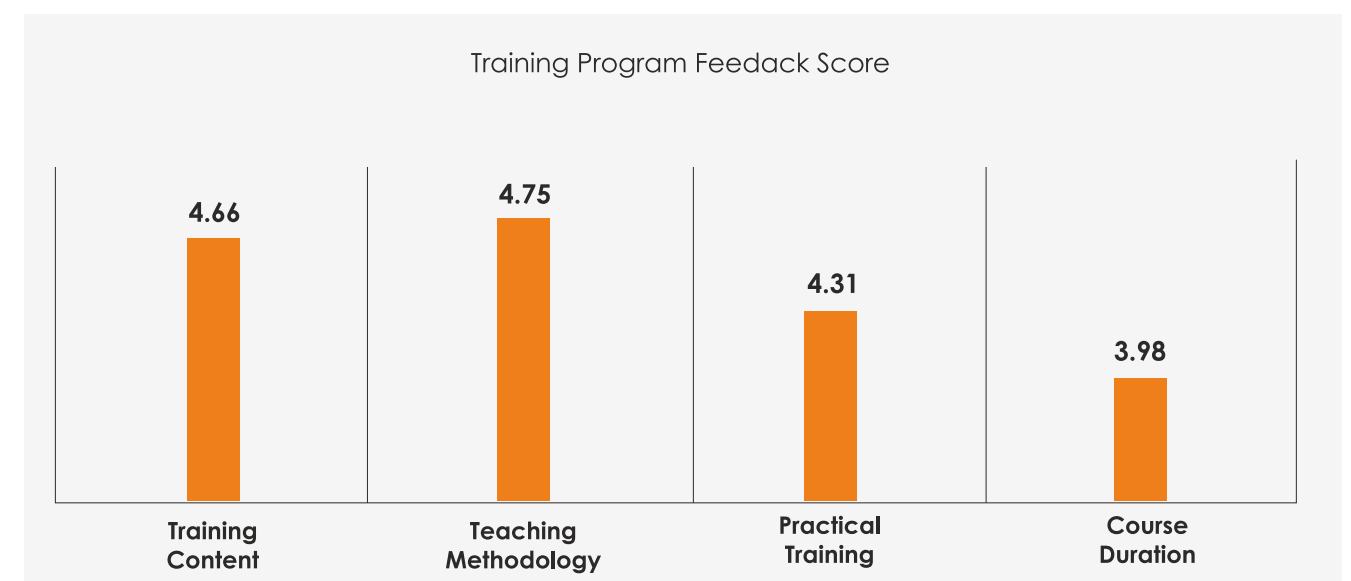

Tarun Kumar,
Electronic Mech. Govt. ITI,
Mayur-Vihar

“ I learned a lot and am inspired to take up solar energy in future. I feel the practical sessions were very good for easy understanding.”

Kajal Sharma
Electronics & Communication,
Govt. Polytechnic College,
Manesar

Students were required to share their feedback about the program and following is the summary of the findings. Maximum score is 5:

MEMORANDUM OF UNDERSTANDING

This Memorandum of Understanding (hereafter referred to as "MOU") has been concluded on the 13th day of January, 2020

BETWEEN

Government Polytechnic, Manesar (hereinafter referred to as "**Polytechnic Institute**"), an educational institution at *NH8, near NSG & NBRC, Manesar, Gurugram, Haryana 122051*

AND

Advit Foundation (hereinafter referred to as "Advit"), a not-for-profit organization registered as a Trust under the Indian Trusts Act, 1882, having its registered office at **101, Anupam Apartments, M.B. Road, New Delhi** and is represented by Ms. Charu Jain, Director.

Herein after jointly referred to as the "Parties" or individually as the "Party".

Preamble

- a) Advit Foundation works primarily in the area of environment conservation and livelihood enhancement. Advit seeks to empower the industry and communities through various viable options for sustainable development.
- b) The Polytechnic institute is desirous of engaging the services of Advit for a Solar PV Energy Technician Training Programme for its students.
- c) Advit has represented that it is competent and has the requisite resources for the attainment of aforesaid objectives.
- d) The Parties have now set out the principal terms upon which the Parties want to explore their further cooperation.

Part 1: Purpose and Objectives

- a) Parties have agreed upon to collaborate to implement a Solar PV Energy Technician Training programme in the premises of the Institute.
- b) The following are the outputs of this project
 - a. A Solar PV Energy Electrician training programme implemented in multiple batches for final year electrical and electronics students as per the course details attached in annexure I.
 - b. Duration of the programme will be on a mutually agreed basis but for a minimum of 1 week.
 - c. Assessment and certification of passed candidates via Skill Council for Green Jobs, NSDC.

Part 2: Scope of Work:**Government Polytechnic, Manesar**

Provide infrastructure support for the training programme.

1. Classrooms
2. Projector and screen
3. White board and markers /Blackboard and chalk
4. Extra measuring equipment – Multimeter, Hydrometer etc. in case needed in addition to those already brought by Advit.
5. Provide time for training (minimum 1 week)

Advit Foundation

1. Develop content for the training.
2. Conduct sessions – Classroom and Hands -on practical sessions.

3. Facilitate expert lectures as and when required.
4. Bring equipment needed for practical training
5. Facilitate assessment and certification of students through Skill Council for Green Jobs, NSDC.

TIMELINE: This MoU is valid till 31st march 2021.

Part 3: Payment and Payment Schedule:

- The project does not involve any financial transactions between the two parties. The programme is delivered free of cost for the students of the Institute by Advit.

Part 4: Term & Termination:

- (a) The Parties have agreed that this MoU shall commence from the date of signing and shall expire upon the agreed date unless otherwise extended/renewed. This MoU may be extended by mutual consent in writing by the Parties on such terms and conditions as may be agreed between the Parties at the time of extension/renewal.
- (b) Notwithstanding the foregoing, either party shall be entitled to terminate this MoU by giving one month's notice in writing to the other party without assigning any reason for such termination.

The provisions of Part 5 (Confidentiality and External Communication), Part 6 (Relationship) and Part 7 (Governing Law and Dispute Resolution) in the MoU shall continue to be effective following the termination or the expiry of the MoU.

Part 5: Confidentiality and External Communication

For the purpose of this clause, "Confidential Information" shall mean all information of confidential nature disclosed by one party (the disclosing party) to the other party (the receiving party) whether in written or oral form which is designated at any time as being confidential or which by its nature or in the circumstances of its disclosure ought reasonably to be regarded as confidential. Confidential Information shall always remain the property of the disclosing party and shall be returned upon first request of the disclosing party.

Regarding Confidential Information:

- a) The Parties undertake towards each other to keep Confidential Information confidential and not to use such information for any other purpose than the activities outlined in Part 2 or to divulge such information to third parties without the written approval of the other party, except when required by law.

- b) The Parties have agreed that all Parties shall treat all business and operating secrets of the other Parties (in as far as they gain knowledge of these within the scope of activities outlined in this MOU) in confidence. Each Party hereto agrees to impose this secrecy obligation on all individuals or firms who assist in the implementation of the activities outlined in this MOU.
- c) The Parties have agreed that information provided by them in the course of the activities outlined in this MOU shall be confidential and shall not be shared with the third parties except with express approval of the disclosing party. The Parties shall ensure that each person to whom information is provided is aware of the necessity for and the obligation of confidentiality as set out herein and that such persons accept obligations of confidence, non-disclosure and return of materials no less onerous than those contained in this MOU.
- d) The Parties may disclose the existence of their working relationship, but only for the purpose deemed necessary to achieve the objectives stated in this MOU. Confidential Information may not be disclosed without the other Party's written approval.
- e) The Parties are not entitled to use another Party's company name (in full or in abbreviated form), trademarks or logos belonging to such Party or other mentions of the Party or such Party's products in press releases or other public announcements.
- f) Advertising, articles and/or other communications aimed at third parties in which another Party is/are mentioned by name, either directly or indirectly, shall be approved by such Party in advance.
- g) The receiving Party shall take all steps necessary or appropriate to protect any Confidential Information against unauthorized disclosure or use and shall promptly notify the disclosing party of any unauthorized disclosure or use of any Confidential Information and shall take all actions that the disclosing party reasonably requests to prevent any further unauthorized use or disclosure of the same.
- h) Parties agree upon confidentiality of the contents of this MOU. It cannot be distributed to third parties without mutual prior written consent.

Part 6: Relationship

This MOU is not intended for, nor shall it create, express or imply, any legal relationship between the Parties that may be construed as an agency or partnership or otherwise and no party shall be authorized to bind the other party to act in its name.

Nothing in this MOU shall be construed to grant a party any right or license under any patent, know-how, trade secret, invention, discovery or improvement of the other party.

Part 7: Governing Law and Dispute Resolution

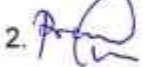

- a) This MoU and all questions of its interpretation shall be construed in accordance with the laws of the Republic of India, without regard to its principles of conflicts of laws.
- b) This MoU shall be subject to the jurisdiction of the competent courts in New Delhi, India.

IN WITNESS WHEREOF, the Parties have duly executed this Agreement on this 13th day of January, 2020.

This Agreement has been drawn up in two (2) original copies, of which each Party has received one (1).

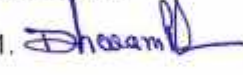

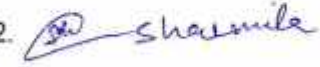

CHARU JAIN, ADVIT

Witnesses:

1.  - Chandramouli
2.  - PRAKASH

Witnesses:

ANNEXURE III

ADVIT FOUNDATION – Brief Profile

Advit Foundation (www.advit.org) is a not for profit development organization, working on Conservation of Environment Resources and Livelihood Enhancement. Advit Foundation has sought to conserve the environment and empower communities through its Water Centred Design for Life where people can manage behaviour and ecosystems to live sustainably.

Advit set up the Solar Information Centre at The National Institute of Solar Energy Gwal Pahari under Ministry of New and Renewable Energy, GoI. Is a training partner with the Skill Council for Green Jobs and NSDC, GoI for Solar Electronics and runs a solar training centre with HARTRON. Advit was the state nodal partner managing the Rajiv Gandhi Renewable Energy Park in Gurgaon for Haryana Government from 2009 - 2015.

Our environmental resources are not infinite. Therefore, at Advit Foundation, our endeavour is to explore endless possibilities and solutions for their conservation. Our initiatives are focused on conservation of water and access to clean energy, overall socio economic development of the poor, skill upgradation and entrepreneurship trainings and holistic village development. This is achieved by unleashing traditional knowledge, identification of new technology and improved communication tools to undertake environment awareness and conservation initiatives.

Advit team closely works on skill up-gradation for climate change adaptation with communities as well as farm-based livelihood organisations. Advit has set up a rural skill training centre, Aarohan, in village Pachala in Phagi block in Jaipur District of Rajasthan where more than 100 women are trained every month. In a country like India where poverty, lack of nutrients, post-harvest losses, and gender inequality still prevails in the agricultural sector, it is important to address the issues with a promising approach and technology to create an economically aligned community.

Advit operates through the following programme areas :

CONSERVATION

The water conservation initiative ensures water availability for drinking, sanitation, agriculture and livestock. As the water scenario improves in the region, the scope and the need for other development activities emerge. The success indicators measured are developed degraded lands, overall socio-economic development of the poor, mitigating drought conditions, employment generation and poverty alleviation.

EMPOWERMENT

The programme is a strategic intervention to address some of the key issues in India's renewable energy development plans which stress upon promotion of the use of renewable energy/ clean energy and development of associated service delivery mechanisms in the country. The program will enable a strong, diverse, and well trained solar workforce. This program ensures that solar instructors are well connected to solar employers, and vocational and engineering students are trained to help increase solar adoption and improve solar installation.

LIVELIHOOD

New skills are introduced and existing ones are upgraded among the community. Advit team closely works on skill upgradation for climate change adaptation with communities as well as farm-based livelihood organisations. In a country like India where poverty, lack of nutrients, post-harvest losses, and gender inequality still prevails in the agricultural sector, it is important to address the issues with a

promising approach and technology to create an economically aligned community. Advit's rural skill upgradation centre, Aarohan, is located in village Pachala in Phagi block of Jaipur district in Rajasthan.

ENVIRONMENT AWARENESS

The initiative undertakes Environment awareness, action and health and safety programmes among school children, community members and industrial shop floor workers. The efforts are to guide how natural environments function, and particularly, how human beings can manage behavior and ecosystems to live sustainably. The programme also designs and undertakes planning and impact assessment of development projects.

A FEW GLIMPSES OF ORGANIZATION'S WORK

- Design and construction of micro watersheds/ water conservation models. Have undertaken more than 18 water conservation structures in more than 25 villages in Phagi, Mandore, Rothwara, Dudu blocks in Rajasthan and Amravati (Maharashtra), Medak (Telengana), Kolar (Karnataka).
- Undertaking Solar Electrical Training with certification from NSDC and Green Council for Skill Jobs. Trained more than 2000 candidates since 2013.
- B.Voc Training partner with TISS for undertaking Solar Electrical Training.
- Set-up Aarohan – rural self-employment training centre, at village Pachala in Phagi, Rajasthan.
- Electrified more than 2500 households in the rural parts of Rajasthan and Haryana using solar home lighting systems.
- Undertaking Safe Chemical Handling trainings for workers of apparel, metal, leather and accessories industries all over India.
- Implemented occupational health and safety trainings for 25 carpet weaving industries in Panipat, Haryana.
- Runs an environment education & school upgradation programme-Prakriti Eco School programme.
- Undertaken solar electrification of forest guard cabins at Pench and Bandhavgarh forest reserves in Madhya Pradesh.
- Undertook revival of handloom clusters in Kerala post Floods in 2018.
- Distribution of 100 energy efficient cooking stoves in Phagi, Rajasthan.
- Facilitated set up of community toilets in 5 villages in Phagi, Rajasthan.
- Facilitated set up of large scale drinking water system in Behror, Haryana.
- Facilitate industries to comply with environment standards - Undertake energy efficiency trainings, audits and other resource conservation methods for various industrial processes.
- Implemented roof top rain water harvesting for buildings. Designed and constructed 3 large models for institutions in Gurgaon.
- Prepared guide book on Energy efficiency and Carbon responsibility for apparel industries – Knowledge book. Supported by GIZ.
- Implemented a Village Development Programme for NABARD at village Meoka, Haryana.

AWARDS

- Advit Foundation is empaneled with TISS CSR Hub.
- Advit Foundation is empaneled with NGO Darpan and the National CSR Hub of the Indian Institute of Corporate Affairs, MCA.
- Empaneled with Skill Council for Green Jobs.
- Empaneled with National Water Mission, Department of Water Resources, Ministry of Jal Shakti, Gol.
- Awarded the first CII beyond the Fence Project award for an industry in Rajasthan in 2009.
- Awarded the Impact Award for Skill Development at the Impact Conclave by Sambodhi in partnership with Bill and Melinda Gates Foundation, SIDBI, YES Bank in 2016.
- Managing Partner - Haryana Renewable Energy Development Agency (HAREDA) from 2009-2015.
- Managing Partner – Centre of Excellence on Solar Electronics at National Institute of Solar Energy, MNRE, Govt. of India.
- Training Partner – Green Skill Sector Council and NSDC, Gol for Solar Electronics.
- Training Partner - HARTRON (Haryana State Electronics Development Corporation Ltd.) for Solar.
- Training Partner – TISS Mumbai B.Voc on Solar Electrical.
